

Invasive Group A Streptococcus (iGAS) infection

Someone close to you has an iGAS infection

If you show signs of the following in the next 30 days

See your doctor

Visit the health clinic

The infection can be easily spread through contact

What can I do to STOP iGAS infections?

Wash hands with soap before eating

AND after coughing or sneezing

Treat all scabies (itchy skin) and skin sores

Don't share smokes or drinks

Treat everyone in the house if anyone has scabies

See your doctor for medicine

Visit your doctor or health clinic if you or your family have skin sores, a sore throat, scabies (itchy skin) or fever
